

Beyond the Yes

A Guide to Wedding Bands

 STULLER

SAYING YES

Is Only the Beginning

Whether worn alone or stacked over time, each wedding band is an opportunity to add depth and meaning to create a cherished reminder of the life you're building together.

Add a gemstone band to represent a milestone anniversary.

Double row bands create a 2-in-1 effect.

Low-profile bands create a luxe look with comfort in mind.

Create a statement with a classic style worn as a bold cigar band.

Choose How YOU STACK

Start With Style | Add Personal Touches | Create Balance

Nesting Stack

Architectural curves, notches, or open silhouettes designed to follow the shape of your engagement ring create a seamless, close-fitting look.

Open bands keep the stack flush.

Bold Stack

Wider bands, strong metal presence, and eye-catching stone shapes come together to create a statement-making style.

Enclosed Stack

Buy ring guards one size larger than engagement ring size.

A solitaire engagement ring framed within a ring guard gives the stack a unified, structured look.

V. **127409** Natural Diamond Contour Band, 3/4 ctw, 14K, 30, \$3,799 | W. **127331*** Solitaire Engagement Ring Mounting, 2 1/6 ct (10x8mm), 14K, \$585 **3C Design**  | X. **689700** Fluted Open Band, 14K, size 6, \$1,379 | Y. **689554** Natural Diamond Eternity Band, 1/2 ctw, 14K, size 7, 30, \$2,189 | Z. **127224*** Lab-Grown Diamond Ring Guard, 5/8 ctw, 14K, 618, \$3,009 | AA. **122419*** Solitaire Engagement Ring Mounting, 1 ct (6.5mm), 14K, \$479

Choose Your BAND TYPE

From foundational pieces to meaningful additions, each band type serves a purpose in both style and symbolism.

Anniversary Band

A band featuring stones that cover a portion of the band with a sizing bar still present and is often chosen to celebrate milestones and mark significant life events

Contour Band

A band that curves around the setting of the engagement ring so that no space is left between the two rings, creating a flush look

V-Shaped Contour Band

Accommodates low-profile or elongated center stones, such as a pear or marquise stone shape

U-Shaped Contour Band

Hugs the curvature of round, oval, or cushion center stones for a seamless fit

Wrap-Style Ring

A single band featuring two or more side stones that can fit around a solitaire ring to enhance the overall appearance

A. **123223*** Natural Diamond Anniversary Band, 1 ctw (2.5mm), 14K, 32, \$4,199 | B. **122107** Lab-Grown Diamond Eternity Band, 3⁵/₈ ctw(5x3mm), 14K, size 7, 618, \$5,835 | C. **127405*** Natural Diamond Contour Band, 1¹/₂ ctw, 14K, 32, \$2,785 | D. **52020*** Contour Band, 14K, \$1,085 | E. **122765** Natural Diamond Ring Guard, 1¹/₃ ctw, 14K, 32, \$3,129 | F. **127364*** Natural Diamond Wrap-Style Ring Enhancer, 5⁸/₈ ctw, 14K, 30, \$4,465 | G. **689558** Open Band, 14K, size 7, \$1,435 | H. **689539** Natural Diamond Open Band, 1¹/₆ ctw, 14K, 30, \$1,549

Eternity Band

A band featuring a continuous line of stones encircling the entire band and finger to symbolize eternal love

Ring Guard

A band made with two rings connected at the base with enough space for an engagement ring to fit in between to give the appearance of an enclosed ring stack

Open Band

A non continuous band design allowing space for larger or uniquely shaped center stones to have a flush fit without requiring a custom contour

Classic Precious Metal Band

A traditional wedding band made from gold, silver, platinum, or palladium, defined by its timeless simplicity and lasting durability

Fancy Precious Metal Band

A precious metal wedding band featuring decorative details, such as engraving, milgrain, or textured patterns and special finishes, for added character

Straight Matching Band

A linear band designed to pair with its matching engagement ring for a clean, traditional look

This band is designed in conjunction with its engagement ring.

Curved Matching Band

A band shaped to follow the outline of a specific engagement ring, allowing for a closer, flush fit

This band is designed in conjunction with its engagement ring.

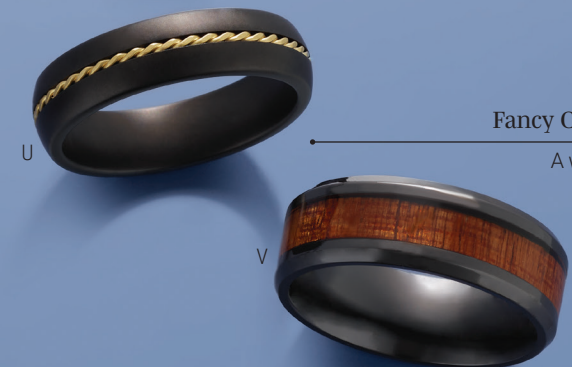

Classic Contemporary Band

A wedding band made from nontraditional materials, such as Tungsten or Cobalt, offering a clean and understated look

Fancy Contemporary Band

A wedding band made of nontraditional material featuring unique patterns or inlays for a more distinctive, personalized style

Sizing Bar

A metal section at the back of a wedding or anniversary band allows for resizing over time. In contrast, styles featuring stones around the entire band are generally more difficult to resize once set.

A. **FR7** Full Round Band, 3mm, 14K, size 7, \$2,175 | B. **122107** Lab-Grown Diamond Eternity Band, 3⁵/₈ ctw (5x3mm), 14K, size 7, 618, \$5,835 **3C Design**  | C. **126666*** Lab-Grown Diamond Anniversary Band, 1⁵/₈ ctw (5x3mm), 14K, 618, \$3,019 **3C Design** 

Achieving a FLUSH LOOK

Straight vs. Curved Matching Band

The height and silhouette of your engagement ring will determine whether a straight or curved matching band is required to achieve the perfect flush look.

Straight Matching Band

When paired with a high-profile setting, a straight band will sit flush with the engagement ring for a balanced, traditional look.

Curved Matching Band

For low-profile settings, a more prominent contour or curved matching band will follow the shape of the setting, allowing the rings to sit closely together.

Curve Variations

From soft curves to more defined V and U styles, each contour band will change how a band frames and fits alongside an engagement ring.

Choose Your SETTING STYLE

Standard Prong

Four prongs hold each stone in place, allowing maximum light and brilliance

Shared Prong

Stones share a prong so they can be set in a continuous line with minimal metal

French

Stones are set closely together and secured by wedged metal with polished and bright-cut surroundings

Pavé

Small stones are set closely together with tiny beads of metal to create a surface of continuous sparkle

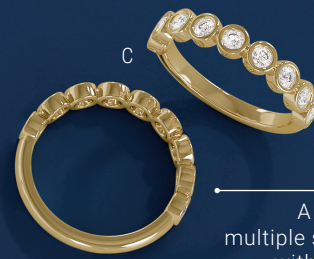

Flush

Stones are set into the shank and sit level with the metal surface, creating a smooth, low-profile design suited for everyday wear

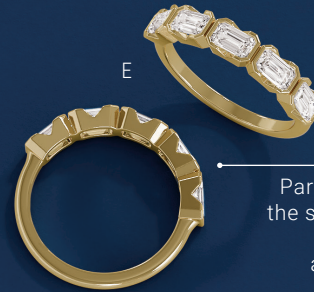

Channel

Stones are set between two parallel metal channels for a clean, structured look

Bezel

A center stone or multiple stones encased with metal, offering a modern setting with added security

Half-Bezel

Partially surrounds the stone, balancing openness with added structure

Bar

Stones are held between two parallel vertical bars, creating a defined and modern design

Pinpoint

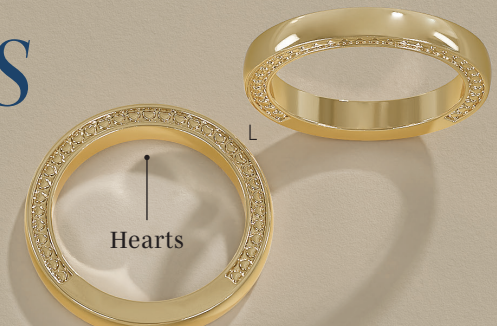

Small stones are set with shared prongs for subtle, continuous detail

Different setting styles determine how much metal is visible and how light interacts with each stone — balancing brilliance, structure, and overall design. Open settings allow more light to pass through, while enclosed or lower-profile styles may offer added protection and a smoother profile.

Make it PERSONAL

Let each band reflect a story or specific chapter with meaningful symbols and heartfelt design choices that feel uniquely individual.

Unique Finishes

Special finishes, such as satin, brushed, or hammered textures, offer a distinctive look, creating subtle variations that feel one of a kind.

Personal Style

From vintage-inspired details to modern, bold designs, each band can mirror an individual sense of style and aesthetic.

Engraving

Messages, dates, or even handwritten details added to the inside or outside of a band capture moments that can be worn and remembered every day.

Personal Symbols

Choose symbols that reflect values, traditions, or personal stories with design elements inspired by nature, culture, or belief.

Meaningful Color

Represent birth months, personal milestones, or moments worth remembering beyond traditional diamonds with gemstones that add another layer of meaning.

Modern EXPRESSIONS

Today's wedding bands offer a wider range of men's styles to suit more preferences, combining traditional forms with modern design details.

Men's Diamond Bands

Incorporate subtle brilliance into structured designs, adding dimension while maintaining a clean and refined look.

Men's Patterned Metal Bands

These bands use surface design to create texture, depth, and visual interest — offering a distinctive alternative to smooth, traditional finishes.

Choose Your METAL

The metal you choose shapes both the look and longevity of a wedding band, influencing how it wears and feels over time.

Silver

With its bright finish and lighter weight, silver provides a clean, classic appearance. It is often selected as a more approachable alternative within precious metal bands.

Palladium

Palladium is a naturally white metal in the platinum family, offering a similar appearance with a lighter, more comfortable feel. Valued for its durability and ability to maintain its color over time, it is a refined option designed for everyday wear.

Platinum

Platinum is a rare, naturally white precious metal prized for its strength and density. Known for its durability and ability to maintain color over time, platinum is a premium option valued for lasting wear and heirloom quality.

White Gold

With a bright, polished appearance, white gold brings a clean and modern feel. Its rhodium finish helps maintain a consistent white tone over time.

Yellow Gold

Often associated with traditional jewelry, yellow gold delivers a warm, familiar tone. Its color can range from soft and subtle to deep and rich, depending on the quality and finish.

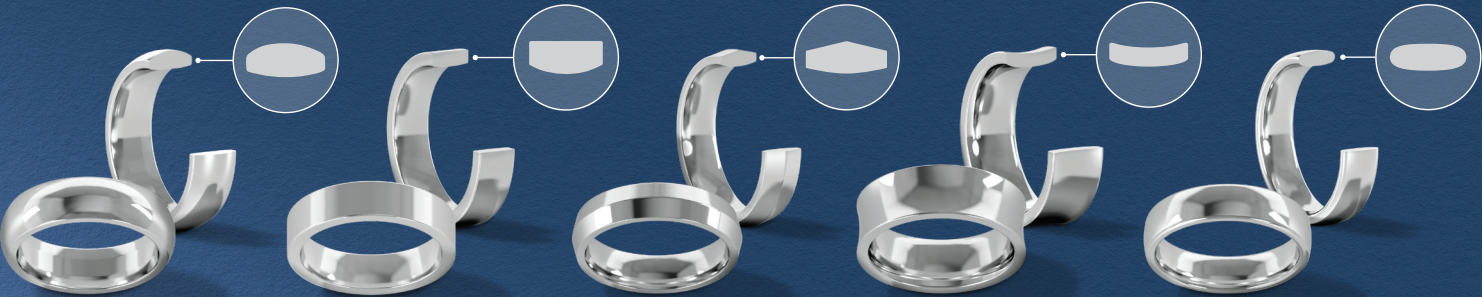

Rose Gold

A unique take on a classic metal, rose gold is recognized for its warm, blush tone. This metal option adds a modern and romantic touch while standing out within a set or stack.

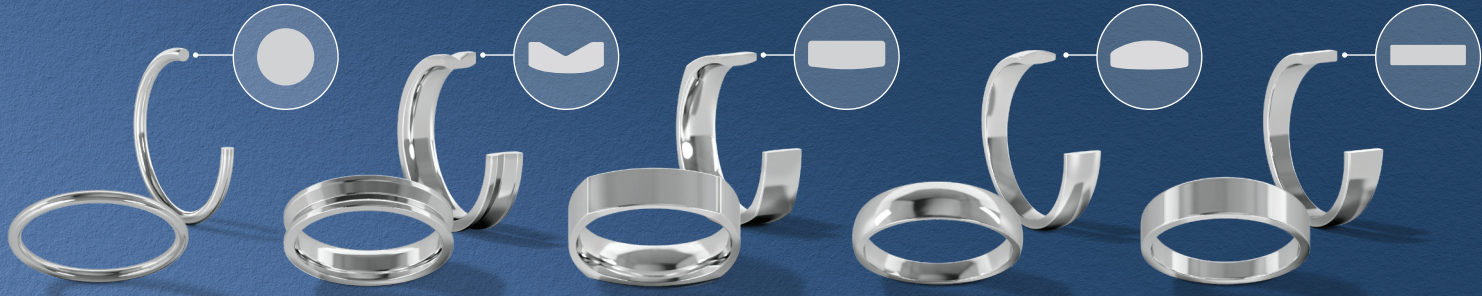

Rose gold is created through a mix of gold and copper and ranges from deeper to more subtle shades depending on quality.

Choose Your PROFILE, WEIGHT, & FIT

From its outer shape to its interior fit, a wedding band's profile, weight, and interior shape all contribute to how it rests on the finger and wears over time.
